BOWDOIN COLLEGE

BOWDOIN COLLEGE was incorporated by the General Court of Massachusetts, upon the joint petition of the Association of Ministers and the Court of Sessions of Cumberland County. The act of incorporation was signed by Governor Samuel Adams, June 24, 1794.

The College was named in honor of James Bowdoin, a grandson of the Huguenot refugee, Pierre Baudouin, who fled from the religious persecution that followed the revocation of the Edict of Nantes, and, in 1687, made a home for himself on the shores of Casco Bay, in what is now the city of Portland. In the next generation the family name was anglicized, and the grandson, James Bowdoin, was born in Boston, which had become the family home, and was graduated from Harvard College in 1745.

He was a staunch and influential supporter of the movement for American independence, a member for many years of the Council, or senate, of the colonial legislature, a delegate to the first Continental Congress in Philadelphia, president of the Provincial Council, and a close personal friend of Washington. He was also the president of the convention which framed the Constitution of Massachusetts, and was subsequently, for two terms Governor of the State.

The College was opened for active work in 1802 with Rev. Joseph McKeen for its first president. The academical, medical, and honorary graduates number together six thousand three hundred and thirty-five; and nearly half as many more have studied here without taking a degree. The living graduates number about two thousand eight hundred and thirty.

BOWDOIN MEDICAL SCHOOL

THE Bowdoin Medical School was established in 1820 by the first legislature of the State. Its course of instruction covers four years of thirty-six weeks each. The students of the first and second years are instructed at Brunswick, where the School has been situated since 1820, and where the scientific departments of the College afford facilities for teaching the primary branches. The third and fourth year classes are taught in Portland on account of the clinical advantages afforded in that city.

PREFACE

This volume, the first edition of the Brunswick and Topsham Directory by the present publishers, has been produced by the most modern and complete system of compilation and should be considered a reliable authority for the information included within its scope. Removals and changes taking place during publication are of course inevitable, but even in such cases the party searched for can invariably be identified and traced from the last address given. The system used herein is based on a complete house-to-house canvass of every street and country road, supplemented by other sources of reliable information. The names of married women will be found in parenthesis with the husband's name. This is an added feature usually found in Crowley & Lunt's directories and in no others. The street and house directory has been added gratuitously by the publishers, thus providing this valuable guide to the streets, which is seldom given in the majority of directories.

We courteously thank all who have assisted in the preparation of the Directory and especially wish to extend credit to the business firms whose patronage has been the means of producing so complete a volume.

BRUNSWICK STREET AND HOUSE DIRECTORY

1917-18

The system for numbering the streets of the town is as follows: Starting at the beginning of a street or avenue, the even numbers will be found on the right side and the odd numbers on the left side. Heads of families and persons in business are shown in the order of their location on each street. Houses on country roads without numbers are shown by a cipher (0). Railroad crossings, street intersections, bridges, etc., are usually shown by a dash (—) except when a number is given for them.

ABBREVIATIONS—Ave., avenue; blk., block; byd., beyond; dept., department; mnfr., manufacturer; n., near; r., rear; rd., road; rep., repairer; rm., room; s. r., summer resident; st., street.

TOPSHAM STREET AND HOUSE DIRECTORY

1917-18

The system for numbering the streets of the town is as follows: Starting at the beginning of a street or avenue, the even numbers will be found on the right side and the odd numbers on the left side. Heads of families and persons in business are shown in the order of their location on each street. Houses on country roads without numbers are shown by a cipher (0). Railroad crossings, street intersections, bridges, etc., are usually shown by a dash (—) except when a number is given for them.

ABBREVIATIONS—Ave., avenue; blk., block; byd., beyond; dept., department; mnfr., manufacturer; n., near; r., rear; rd., road; rep., repairer; rm., room; s. r., summer resident; st., street.

ZONES — PARCEL POST GUIDE AND MAPS. For parcel post purposes the United States is divided into units of area thirty mimutes square. Such units form the basis of the eight postal zones. To ascertain in which zone a post office is located from the office of mailing, a parcel post guide, costing 50 cents, and map, costing 20 cents, are jointly used. The guide applies to all offices, but a separate map is required for each unit. A zone key is furnished with the guide for use in the units of area in which some of the largest post offices are located, and makes the map for those units unnecessary. The guide and maps may be purchased by sending a money order to the Third Assistant Postmaster General, Washington, D. C. Stamps are not accepted.

BUSINESS DIRECTORY OF
BRUNSWICK AND TOPSHAM, MAINE

BRUNSWICK

A prosperous and growing town with a population of 7000, famed for its wide streets, beautiful homes and picturesque environment. Widely known as the seat of Bowdoin College, one of the oldest and foremost universities in the United States. Brunswick is 28 miles from Portland and 143 miles from Boston, with excellent railway connections and trolley service to all points in New England. Seacoast is on Casco Bay with wonderful views and wooded shores. An ideal manufacturing center. Situated on the Androscoggin River, a few miles from Bath, on one of the best water power sites in Maine. Pure water — abundant electric power, cheaper than steam. Industrial content. Superior educational advantages, with modern school buildings. Excellent banking facilities, three National and two Savings Banks. Interesting inducements to manufacturers.

The following is a classified list of all Trades, Professions, etc. arranged alphabetically. In this list the towns are arranged alphabetically as well as the names in each town.

NOTE especially that it has been found essential (as a general rule) to insert names of firms, or individuals, under only the ONE heading which best represents them, except in the case of patrons, when extra insertions are sometimes made.

Numbers after address indicate the Rural Delivery number and unless otherwise specified this means the rfd from the town itself.

Abbreviations: — B., Brunswick; L. F., Lisbon Falls; Pej., Pejepscot; pg., page; r., rear; smr., summer.

* Patrons' insertions only under these heading.

*Acetylene Welding

General Instructions.

To give an alarm, get the key by breaking the glass in the small box attached to the fire alarm box, open the door, pull the hook to the bottom of the slot once and let go, then close the door.

Alarms are to be given from the box nearest the fire. Aftr giving an alarm remain or leave some one at the box to direct the firemen to the exact locality of th fire, and see that no one except a fire official interferes with the box.

All alarms for the same fire after the first alarm, to be given by the fire

officials. Do not give an alarm for a fire seen at a distance, be reasonably sure there is a fire before giving an alarm.

Never open a box except to give an alarm. After opening the door the key cannot be removed except by a fire official with a master key. Alarms for fires out of town and all signals will be given only by officials of the fire department.
